

NLST group meeting

Saturday 13 November 2.30-4.30pm Practical afternoon with Jackie O'Malley

Using metal to embellish fabric

Jackie will give a short presentation showing how metals and metallic paints can be used in embroidery.

We will then make a small metal shim embellishment that could be used to enhance a piece of work or made into a brooch. Materials to make the shim embellishment and brooch will be provided.

You will need to bring:

- a basic sewing kit
- sewing scissors
- craft scissors if you have them
- notebook and pen - if you like to take notes
